

About **BROS**

Bros.art is an independent design studio located in mainland Portugal and Prague. We unite young designers and combine original art, product design and audiovisual production. We produce both digital and physical projects, each with a distinct visual identity and narrative.

We design tourist products and souvenirs, currently focusing on original magnets for businesses and retailers. Some of our products use a QR code to link the physical object with a video or animation, so the experience can extend beyond the product itself.

In addition to designing products, we also produce original sculptures, artwork, and oil paintings for interior spaces. We also do 3D modelling, prototyping and 3D-printing.

We develop the audiovisual component of our work through Bros Animation Studio, where we produce videos, 2D and 3D animation, visual effects, sound effects and complete audio postproduction, from sound editing and composition to the final mix.

We are a young studio with a vision to combine design, fine art and new technologies to produce distinctive, thoughtful and carefully crafted work.

What We Do:

- Tourist product and souvenir design
- Magnets connected to videos
- Original art projects for residential interiors
- Oil paintings and sculptures
- 3D modelling and 3D printing
- Video production
- 2D and 3D animation
- Visual effects
- Sound effects, editing and mixing
